**A SINGLE SMOOTH  
EASY-TO-CLEAN SURFACE  
TEXTURE WITH A  
HIGH SLIP-RESISTANT  
PERFORMANCE.**

This revolutionary concept called **INOUT**, developed by our Spanish tile supplier partners. Unlike conventional non-slip tiles, where randomly, applied abrasives are used to create a rough hard-to-clean surface texture, with **INOUT**, a fine uniform coat of microscopic granules is applied to the tiles so as to create a smooth slip-resistant easy-to-clean surface.

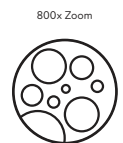

This innovative finish is possible thanks to Stylnul's exclusive manufacturing technology.
