

WARRANTY CHECK LIST

SURFACE PREPARATION

THE SURFACE TO BE TILED MUST BE SOUND, HARD, DRY AND CLEAN?

- Use Ezee Care Grout Remover and Ezee Care Heavy Duty Cleaner to remove surface contaminants.
- Use Ezee Care Mould Remover to remove organic fouling.
- Two coats of Ezee Basecoat and Keycoat must be applied to the substrate to prepare the surface and ensure maximum adhesion.

TILE ADHESIVE

THE 10 YEAR WARRANTY ONLY APPLIES IF THE RECOMMENDED TILE ADHESIVE FOR THE TYPE OF TILE IS USED.

- Ask the sales representative for assistance or use this brochure for direction.

TILE GROUT

TILE GROUTS ARE NOT ONLY FOR AESTHETIC PURPOSES, THEY ARE ALSO DESIGNED TO ABSORB THE STRESS IN THE SYSTEM.

- Ezee Waterproof Grout must be used for the warranty.

EXPANSION JOINTS

BUILDING AND TILING SYSTEMS MOVE AT DIFFERENT RATES AND EXPANSION JOINTS NEED TO BE INSTALLED TO CATER FOR THIS MOVEMENT.

- Ensure perimeter expansion joints are installed around all tiling systems – wall and floors.
- Intermediate expansion joints must be installed whenever the tiled area is greater than 5m x 5m.
- Use Ezee Expansion Joint Sealant to fill any exposed joints.

EZEE XXL TILE ADHESIVE

THE ONLY ADHESIVE TO USE ON EXTRA-LARGE FORMAT CERAMIC & PORCELAIN FLOOR TILES

PRODUCT DESCRIPTION

XXL ADHESIVE is a polymer modified tile adhesive designed to install extra-large format (>600 mm x 600 mm), ceramic and porcelain floor tiles. This product superior adhesion properties and is suitable for interior and exterior applications as well as intermittently wet areas. The extended open time and improved workability provides applicators with sufficient time to overcome the difficulties with installing extra-large format tiles which ensures a beautiful level finish.

- Designed for tiles up to 800 X 800mm and larger
- Suitable for interior and exterior application
- Floor applications only

EZEE WATERPROOF TILE GROUT

OUR PREMIUM QUALITY GROUT AVAILABLE IN 11 FASHIONABLE COLOURS

PRODUCT DESCRIPTION

WATERPROOF TILE GROUT is a specially formulated cement based polymer modified grouting compound designed to point tile joints up to a width of 8mm. This class leading product incorporates additives to improve flexural strength, increase abrasion resistance, minimise shrinkage, reduce dirt pick-up and increase water resistance. WATERPROOF TILE GROUT is suitable for both wall and floor as well as interior and exterior applications. For the grouting of tiles in intermittently wet areas as well as in underwater conditions i.e. swimming pools and showers.

AFRICA'S PREFERRED
TILING SOLUTIONS

ABOUT US

As one of the leading tile adhesive suppliers in South Africa, Ezee Tile (Pty) Ltd has become a name synonymous with quality and value when it comes to tiling solutions. We understand tiling – but more than that, we understand what it takes to set the standard of excellence for surfaces that not only look good, but also stand the test of time. It's in the formulation of each and every product we manufacture and in the service we provide our customers.

Incorporated in 1994 and originating in Boksburg, Ezee Tile quickly stepped up as a front-runner in the industry. With head offices now located in Vulcania Brakpan and forming part of the Italtile Group, Ezee Tile has grown significantly in both capabilities and scope of operations. As the only company to have production and distribution facilities in all of the major centres throughout South Africa as well as 4 facilities in neighbouring countries, Ezee Tile is easily recognised as the biggest tile adhesive and grout manufacturer in the country. More recently the company has expanded its market by opening manufacturing plants in other African countries, namely Namibia, Zimbabwe, Zambia and Kenya.

THE PERFECT ADHESIVE FOR NATURAL
STONE CLADDING & LARGE FORMAT TILES

PRODUCT DESCRIPTION

FLEXIBOND ADHESIVE is a specially formulated cement-based polymer modified tile adhesive designed for the installing of ceramic, clay and cement based tiles onto all types of cement based surfaces as well as other pre-primed surfaces. FLEXIBOND ADHESIVE is recommended for larger format tiles (>400mm x 400mm), tiles with high porosity (>8%) and most high stress application areas like suspended slabs, high traffic walkways, outdoor patios etc. This product is suitable for both wall and floor and interior and exterior applications.

- Designed for medium ceramic tiles up to 600 X 600mm
- Suitable for wall and floor application
- Suitable for high traffic areas

PRODUCT DESCRIPTION

VITROFIX ADHESIVE is a specially formulated cement-based polymer modified tile adhesive with improved workability, increased bond strength and extended coverage. VITROFIX ADHESIVE is designed for installing semi-vitrified tiles and is also suitable for fixing of ceramic, clay and cement tiles as well as natural stone tiles and mosaics onto all types of cement based surfaces as well as other pre-primed surfaces. This product is suitable for application of tiles in permanently wet areas as well as in underwater conditions i.e. swimming pools and showers.

- Designed for Kilimanjaro tiles
- Suitable for wall and floor application
- Suitable for intermittently wet areas
- Improved workability with increased bond strength

PRODUCT DESCRIPTION

PORCELAIN FIX ADHESIVE is a specially formulated flexible, high strength cement-based polymer modified tile adhesive with improved workability, increased bond strength and extended coverage. PORCELAIN FIX ADHESIVE is designed for installing porcelain and other nonporous tiles (e.g. natural stones, vitrified tiles etc.) onto all types of cement based surfaces as well as other pre-primed surfaces. This product is suitable for both wall and floor applications, for installing tiles in intermittently wet areas as well as in underwater conditions i.e. swimming pools and showers.

- Designed for porcelain and large format tiles up to 600 X 600mm
- Excellent workability
- Interior and exterior applications
- Outdoor, indoor and wet areas

PRODUCT DESCRIPTION

QUICK FIX 6 ADHESIVE is a high strength quick setting cement-based polymer modified tile adhesive designed for the installing of ceramic, clay, porcelain, natural stones and cement based tiles onto all types of cement based surfaces as well as other pre-primed surfaces. QUICK FIX 6 ADHESIVE is professional grade adhesive recommended for projects with short turnaround times or for applications that require high compressive strengths like tiled garage floors. This product is suitable for both wall and floor as well as interior and exterior applications.

- Sets in 6 Hours
- Designed for tiles up to 600 x 600mm
- For projects with short turnaround times or for applications that require high compressive strengths like tiled garage floors
- Suitable for wall and floor

PRODUCT DESCRIPTION

CLADDING ADHESIVE is a polymer modified light coloured cement based tile adhesive designed for installing extra-large format (>600 mm x 600 mm), heavy natural stone, porcelain and cement based tiles, to all pre-primed surfaces. CLADDING ADHESIVE is suitable for permanently wet areas as well as interior and exterior applications. This product has exceptional anti-slip properties, an extended open time and excellent workability.

- Suitable for interior and exterior application
- Suitable for wall and floor application
- Superior anti-slip properties
- Can also be used for large-format tiles larger than 800 x 800mm
